

# THE EMPRESS EXPRESS

VOLUME XIV. NO. 22

EMPRESS, ALTA: THURSDAY, Oct. 28, 1926

Price: \$2.00 Per Year

United Church  
Rev. N. W. Whitmore, B.A.  
Minister

Church School, 11 a.m.  
Public Worship, 7:30 p.m.  
In view of special services on Thanksgiving Sunday, the Minister will deliver an Armistice Day address, "Jesus and Good Will." Story sermon for children. Heartily congratulations singing, led by the choir.

Beautyland

Public Worship at 3 p.m. An Armistice Day address by the Minister, also something for the children.

The regular meeting of the L.O.D.E. will be held next Tuesday afternoon, November 2nd, at 3:30 p.m. at the home of Mrs. A. York.

Mr. and Mrs. McDonald, of Sceptre, were the guests of Mr. and Mrs. W. C. Boyd, on Sunday.

It is pleasing news that the Rev. G. G. Pybus, will officiate at the dedication of the new United Church, also that Mrs. G. G. Pybus is to visit in Em.

There is to be a Turkey Supper, November 8, given in connection with the opening of the new church.

Fall Planting of Bulbs

Now is the time to prepare for fall planting of bulbs. A bed of tulips planted this fall will give a great display for many years without attention. Primroses, tulips and crocus for fall or spring planting. Mrs. E. S. Suttor, agent for the Prairie Nursey Co.

Two Bustall Men  
Killed In Auto Smash

August Angerman and Isaac Jaewer, of Bustall, are dead as the result of a triple motor car accident, near Beiseker, Alta. Mr. Angerman was killed, when two cars met in collision. Directly following, another car, said to be driven at a high speed, crashed into the disabled cars, hurling Jaewer, a distance of twenty feet and instantly killing him. The accident occurred between 9 and 10 p.m., on Saturday night.

Conducts Interesting Service

Rev. A. W. Ingram, of Sceptre conducted the Union Church services on Sunday, in this district. In the evening he conducted the service in the local church, and had a large attendance.

His text was, "I came not to call the righteous, but the sinners." He handled his subject well and thoroughly and had the interest of the congregation throughout his discourse. He is a pleasing speaker to listen to and his sermon was received very favorably.

Miss M. Peers, of Acadia Valley, is visiting at the home of Mrs. E. H. Fountain.

An auction sale of fifty head of the Kennedy brand of horses, is billed for Saturday at the Stockyards.

Alfred Tribune, S.E. 20 24 23 w. 4th, fifteen miles north-west of Bindloss, is holding an auction sale of his stock and effects at his farm, Tuesday, Nov. 9.

Errol Sanderson returned last week from S. Skerton. He reports that his S. Skerton is getting along well in the smotherbury and says that things are going in order.

From 10 to 15 m. of the fall plowing has been completed.

Messrs. John Sanderson, Ken McRae and Roy Frantzy, teachers in the Hills and Schuler districts, were visitors in town over the weekend. John Sanderson, says that the best wheat yields in the Schuler district would not be more than fifteen bushels, however, the general grain returns are better than they have been for the last two years.

ture. They are always fresh and secure the distri-  
butor's demand. Get Yours at the

**EMPRESS DRUG CO.**

United Church Bazaar

The Ladies of the Congrega-  
tional desire to report that their  
annual bazaar would seem to  
be getting bigger and better  
each year.

This recent event was well  
attended, grass receipts being  
over \$200 with approximately  
\$100 to apply on the building  
fund. The organization renders  
its grateful appreciation for  
the loyal work of committees, and  
demonstrations of farm produce,  
fancy work and food and to all  
who aided in the success attained.

Have Good Time  
At Novelty Dance

Those who attended the Novelty Dance, on Tuesday night, report a most enjoyable time. Bustall was artistically demon-  
strated, light effects were used,  
and the dancers entered into  
the spirit of the evening with a vim. Sunny South-  
enders supplied pleasing mus-  
ic. Dad Nelson was floor man-  
ager.

C.P.R. Crop Report

Winnipeg, Oct. 25.—The weather throughout Alberta has been favorable for threshing with the exception of parts of the Edmonton Division, where further rainfall was experienced. Showers were experienced in other sections of the Province, but were not sufficient to cause a suspension of operations. Threshing is now general and from 75 per cent of the wheat and 65 per cent of the coarse grains have been put through the machines. The returns on the whole are running higher than originally estimated, and the grades are fair. The weather is certainly anticipated and while there is depreciation through depreciation, the loss from sprouting is small. From 10 to 15 m. of the fall plowing has been completed.

Mr. John Sanderson, Ken McRae and Roy Frantzy, teachers in the Hills and Schuler districts, were visitors in town over the weekend. John Sanderson, says that the best wheat yields in the Schuler district would not be more than fifteen bushels, however, the general grain returns are better than they have been for the last two years.

What About a New Ford

London, Ont., Sept. 18.—This year's annual turif that comes once in a lifetime can be had for \$100. Farmers in the grandstand at the Western Fair will be able to see stand and Ford camp away from a Whippet and Chevrolet competitors in the special five mile race on the Fair Grounds track. The field is composed of nearly six hundred yards ahead of the other contestants, making this five mile grind in 7:27. The race will be run on the 20th of October, and the race is to be a challenge issued by the Whippet representatives to all owners of light cars.

The spectators saw a thrilling competition, the fact that the Whippet led the way for the first four miles the contest was exceptionally keen between the Whippet and the Chevrolet.

The Whippet made a good

start in the corners but a

turn in the race ground

# RED ROSE TEA

"is good tea"

You've been intending to try  
Red Rose sometime. Why not now?

## Growth Of Wheat Pool Movement

The farmers of Western Canada in less than three years, have established the largest co-operative organization of its kind in the world. The Canadian Wheat Pool, with its three units in the provinces of Manitoba, Saskatchewan and Alberta, now has a total membership of 125,000 farmers, who control 15,230,000 of the 21,000,000 acres sown to wheat last year in the three prairie provinces. It is hardly the scale of the great movement that the farmers of Canada, and Canada already exports more wheat than any country in the world.

The first of the three wheat pools commenced business in the province of Alberta in October, 1923, and at the close of the first pool year on July 15, 1924, the total membership was 31,450,000.

Alberta, Manitoba and Saskatchewan were organizing pools, in the fall of 1924, they had perfected provincial organizations and the three provinces then merged their selling strength into one giant marketing organization, known as "The Canadian Co-operative Wheat Producers, Limited." This agency is incorporated under a Federal charter with very wide powers. Its function is to procure the wheat produced in the three provinces, to collect, grade and place it on the market of the world in such a manner as to secure a price commensurate with the natural law of supply and demand. Each of the three provincial pools is responsible for gathering the wheat of its own members and placing it at the disposal of the central selling agency, which is controlled by a board of nine directors composed of the presidents of the three provincial pools.

The largest proportion of the wheat to be sold by the selling agency to importers and buyers in different countries of the world, for the agency has direct selling connections with every wheat importing country and its own representatives in 51 ports of the world. The funds which accrue from the sales are disbursed to the members of the three pools. This method of handling the wheat in the largest volume through one agency and reduces the cost of operation to a minimum.

It is difficult, if not impossible, to estimate in dollars and cents the actual increase in the price of wheat attributable to the operations of the wheat pool, but the Pool, controlling as it does over 50 per cent of Canada's exportable surplus, had the opportunity to increase the price of wheat somewhat after the War. The Government of Western Canada urged the Government to maintain the Wheat Board, but as it had been brought into being and had functioned under a War Measure Act, the machinery for its maintenance automatically passed out of existence with the signing of the Peace Treaty. The wheat producers of the Canadian West, learning that the Wheat Board could not continue to exist, organized themselves and took control of their own marketing of their wheat in a way that would prevent a free wheat fluctuation and secure a better stabilization of prices.

Through the Pool the wheat is handled at cost and therefore a saving to the farmer. The Central Selling Agency with its direct sales is able to eliminate some of the handling charges of the middlemen and save the farmer the extra expense of a banker's method of marketing. Moreover, the Pool relieves the farmer of the necessity of guessing the right time to sell his grain and assures him of the average price for the year on all wheat R.S. sells. This orderly marketing avoids the disastrous effects of the flooding of the market in the fall which prevailed, under the old system.

The wheat Pool in Western Canada is a notable example of the advancement made by the farmers of this stage. Already it has shown the possibilities and advantages of co-operative marketing. Under the old system the farmer sold his wheat and took what the market offered. In the Pool system he delivers his grain when convenient and obtains the average price of the scaling period, together with the saving in handling charges. The Pool price is the number in the price. For wheat, less handling charges and freight charges. The latter, of course, vary, according to the length of the haul.

With the development of Canada's agricultural areas, only one-fifth of which are as yet under cultivation, the growth of the Canadian Wheat Pool may reach a magnitude never before conceived in co-operative marketing.

### Farm Settlers U.S.

Active movement of farm settlers from the United States to Canada continues, according to the department of immigration and colonization. Last year 10,000 immigrants came to Canada and all report increases for the month of August, with the agency at Fargo, N.D., the highest. In which, it has written: "N.D.—This month we have 272 farmers, who, with wives and children make a total population of 222. They brought with them \$15,355."

Mr. Everest, in the Himalayas, is 29,600 feet above sea level.

### Scheme Did Not Work

A man entered the vestibule of a local hotel and placed his umbrella in the stand, but before going upstairs, he had to remove it to the entrance of the stand, the umbrella being a champion boxer, in fact.

In twenty minutes he returned, but the umbrella was gone. The hotel manager was very much there, and someone had written: "P.S.—Umbrella taken by a champion long distance runner. Won't be back at all."

It only manufactures a third of the artificial silk now produced in the world.

### Farmer Is Killed

Was Owner of 52 Quarter Sections in Saskatchewan

Death came instantaneously to Stanley Clark, wealthy farmer of the Frontenac district, while he was working on his farm. The late Mr. Clark was 70 years old, and was owner of 52 quarter-sections in Saskatchewan. The news reports record the fact that the deceased had been a rancher since 1913, and "died in his sleep." This is the "old story." It should also be written into the record, that the late Mr. Clark was a valued and respected member of the Wheat Pool, having signed a contract on the 29th of August, 1923, his number being 65-930.

### Niagara Trans-Atlantic Cables

The nineteenth trans-Atlantic cable is to be completed and it is to be decided whether to make non-polarizing the advances in wireless communication across the ocean—from the Dogon Transcript.

Women in Asia, Northern Japan, induce bearded faces so much that they shave their own to make them appear whiskered.

Keep Minard's Liniment in the house.

She—Why is your voice so sharp?

He—Because I have been trying to get a word in edgewise for a whole week.

More Canadian homes have automobilia than batubilia. Well, where can you go in a bathtub?

W. N. U. 1919

### Germany Now Thinks War Is Calamitous

International Society's insanity on a Whistlestop Sojourn

It was the fashion, only a few years ago, to glorify war and to create in the minds of young men an impression of its necessity. Germany was particularly eager to give its youth a strong martial spirit and to do so before their military days. If Stresemann speaks for his country—and there is no reason to doubt that he does—the Germans have had a complete change of heart. The appealing speech of the Foreign Minister to them, as they have taught other nations, that war is not glorious, but always calamitous. International warfare is insanity on the wholesale scale. It is a curse to all humanity. The only way to defend one's country when it is threatened; is to noble to lay down one's life in a just patriotic cause. But if wars can be prevented as they can, if the proper state of mind is cultivated, it is the duty of every young person to help in movement along.

### RHEUMATIC SUFFERERS

May Obtain Relief by Enriching the Blood Through Use of Dr. Williams' Pink Pills.

In the days of our grandfathers rheumatism was a disease of which there was no available remedy of reliable life and old age. Almost every elderly person was a sufferer. The disease was especially prevalent in the Province of Quebec. Government. Mr. Lessard has had a particularly brilliant career at McGill University during the past two years, and will continue his study of railway construction.

Mr. Lessard also held the position of tool controller at the Canadian Pacific Hotel Algonquin in St. Andrews, N.B., for three years. He is not yet twenty-two years old.

Strategic New Pygmies Found

Scientists say New Guinea Bush Men Were Friendly

In dense infantil jungle never before successfully penetrated by white men, a new group of pygmies has been discovered an entirely new group of pygmies. Details of the discovery have been received from the Associated Press, accompanied by a photograph of the discoverer. The discoverer was captured by a bush runner.

Entering a country in which previous expeditions had been decimated through fever and malarial, the scientists have been able to penetrate the strange small people, who are quiet and sedentary, hemmed in by jungles, covered mountains and cut off from the rest of the Papuan tribes.

Andrew W. Stirling, of Berkeley, Calif., one of the leaders of the expedition, described the bush men as unusually friendly.

The pygmies, he said, talk in unbroken streams of speech, and seem afraid of being too ostentatious. They were not timid, but quite intelligent and always cool and collected.

"The first thing they did was to give us all a present. The presents consisted of the strangest bows and arrows, arm bracelets, bananas and beaded nuts."

"They value tobacco, sweet potatoes, bananas and pigs. They brought us a pig and all gathered around to make a ceremony of killing it."

### A Wonderful Discovery

Swiss Scientists Find a Radioactive Substance

Two Swiss scientists, Doctors Edouard and Desaix, have been living in a tent for the last month on the summit of Mount Mont Blanc, even at an altitude of 13,465 feet, making astronomical observations, having a remarkable scientific laboratory.

They say they found that a certain group of stars sent out extraordinary rays of light which radiate active force in far stronger than roentgen rays. They hope to use these rays to examine trees for insectical and medical purpose. The scientists, owing to the cold weather, were obliged to interrupt their investigations and have descended to Interlaken.

### Farmers Have Received

Patronage Refund

Saskatchewan Farmers Benefit by Pool Elevator Shipments

The distribution of \$176,611 as a patronage refund to the farmers who utilized Pool Elevator facilities in Saskatchewan last crop year, will be welcome news to all. It represents 2 cents per bushel on a total of 8,800,000 bushels through the 58 houses of St. Paul Pool Elevators Ltd., last season, and 1 cent per bushel on coarse grain. 1½ cents per bushel on coarse grain so shipped. Last year's handling charge on wheat being 4 cents, the round will reduce same to a two cent rate.

The man who tells you that he has nothing to say is usually capable of saying a good deal if he were so inclined.

The smallest Island owned by the United States is Samoa, with an area of 77 square miles.

For all pains—Minard's Liniment.

## FREE TO INVENTORS

### Claimed By Ireland

British National Anthem and "Yankee Doodle" old Irish Tunes

"Yankee Doodle" is not American at all—it's Irish, according to Dr. Gratton, a noted Irish authority on musical history. He says that "Yankee Doodle" was originally an Irish air known as "All the Way to Galway."

"God Save the King," the British national anthem, Dr. F. D. Flood, also is old with "Yankee" which originated about 1595 and has been going strong ever since.

A Household Medicine.—They that have a cold, should apply the properties of Dr. Thomas' Electric Oil in the treatment of many ailments will find it a valuable remedy. It is without doubt a household medicine and as it is effective in dealing with many ordinary colds, it is a valuable aid.

"The disturbance is in a solar latitudinal region, the sun coming out in the east side of the sun. Many photographs have been taken and very rapid changes are taking place," Professor Frost said.

Sunspots are not generally visible to the naked eye, he explained, unless group over vast areas.

### Gave Away A Fortune

Whoever Inherited a Million Dollars Disbursed Amount in Four Years

It has taken Charles Garland, inheritor of a million dollar fortune, four years of earnest effort to give it away. But he has succeeded at last in giving away his inheritance, the trustees of the American Fund for Public Service, Inc., have officially announced their triumph and the figures show that only a paltry \$14,000 given over or given up, is left.

"I have given away and blown to many causes and movements that had hoped to get through their teeth period on a part of the Garland trust fund."

The last known issue of "Baby Stamps" was begun Oct. 1, 1893, bearing the first baby portrait of King Alfonso XIII.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the body. Worms and intestinal flukes sufferers cannot value their altitude, but there are many signs of worms. The best known is dose of Miller's Worm Powers. These powders act quickly and will remove from the body all inconveniences to the child.

## Mapping Spread Of Trees In The Prairie Provinces To Ascertain Rate Of Growth

Mapping the spread of trees in the prairie provinces is the object of ascertaining the rate at which that spread goes on, is one of the latest activities in which Prof. V. W. Jackson, of the Manitoba Agricultural college, and other authorities on agriculture, are engaged.

For the past year or two, done in connection with a systematic campaign to have more of the prairie covered with trees than is at present the case and yet in no way interfere with agriculture, the authorities have the caption of *comparatively-slow-sprouting* strips of land along the banks of the rivers, streams and lakes, the prairies were treed up to the last century, according to Prof. Jackson, and a well-known American, Lawrence, the first white man to explore western Canada, as expressing his surprise at the lack of foliage on the prairie, proper, whereas some of the districts through which these prairies pass, are now practically covered with trees.

So far, the spread of the poplar has been the most remarkable, he noted, according to Prof. Jackson. All through Saskatchewan, "poplar is having a surprising, and rapid, spread also, and it appears that the poplar spreads all the more rapidly as new land is broken for agricultural purposes. It is only a matter of a few generations until there will be such a thick stand of poplars that they will grow even faster than the trees."

While the poplar is easily first in the way it adapts itself to the conditions of the prairies, salalists are still to be found in the prairie provinces also, and it appears that the poplar spreads all the more rapidly as new land is broken for agricultural purposes. It is only a matter of a few generations until there will be such a thick stand of poplars that they will grow even faster than the trees."

For many years afterwards a rumor credited him with being "kept a prisoner" in Aspasia House. Many visitors to the McCallum residence have made up their minds that the famous general was imprisoned there in the hope of catching a glimpse of the captive "Iron Duke."

It was natural that the butchery of the Caesar and his family should breed legends of a marvelous character.

John Jackson, "the Iron Duke's daughter," is reported alive in various parts of Europe, so there are hundreds of thousands of Russians who credit the myth that the last Caesar is still alive.

It is but a few months ago that a story appeared in several newspapers in Russia reporting that a monk appeared in Moscow, who claimed to be the last Caesar.

This monk, who was a peasant, had, as in the case of the czar, the process of the czar, was being closely watched.

### Healthy Livestock In Saskatchewan

Work in Connection With Tuberculosis

Test Shows Few Reactors

The first test for the eradication of bovine tuberculosis in its rural municipalities east of Long Lake, Saskatchewan, has recently been completed. This work was conducted by the Dominion Bureau of Statistics and the Provincial Department of Agriculture and Rural Affairs, who gave the report to the Provincial Government and the rural municipalities. In all 21,178 head of cattle were tested and only 176 reactors, or one in 120 head, were found to be reactors. This shows that the rural municipalities have reactors in a very healthy condition, and it is hoped that farmers in the rural areas will endeavor to improve the quality of their stocks by making a new breed area as well.

### Effeminate Youth

Chicago Doctor Says Thymus Glands  
Responsible for Vagaries of  
Present Generation

The trouble with the "so-called" men of the world of the "present generation" is that their glands have continued to operate, their development from childhood, Dr. Victor H. Lindlahr, of Chicago, told the audience at a meeting recently in a small meeting room at Toronto. Dr. Lindlahr said the fact that the thymus glands were operating beyond their proper period was due to the softness and luxury with which the march of science and civilization carried on in the lives of the average person of 1920.

**Spoiled When He Saw Canada**  
Mr. Alfred Bilton, who came to Alberta from England, has written back home of his impressions of the country to Mr. O. G. Hurdle, Canadian Government Agent, at 201 Yonge Street, Toronto, New York. Says Mr. Bilton: "I am going to tell you, when I think of Canada West, I was surprised when I saw the amount of wheat grown in Canada. This country is the land of opportunity and there is plenty of it."

### Had To Be Careful

The wife of a dining man sent out for a prancer to come to the bedside of her husband, who was not better than he was before. The prancer came and said: "You have better renaunce the devil, my friend."

"Renounce the devil?" exclaimed the dining man. "Wha! I am not in the position to make any enemies now?"

The Outlook

### History Rich With Myths

Many Famous People Believed Clever  
After They're Dead

Strange stories concerning the re-appearance of famous people after their death provide an interesting number of myths that refuse to perish. One of the most curious is the legend that the late General Macdonald was credited with existing after his death.

Some years ago the uniquely odd of the country, who rose from the ranks, a runner, said he was a "Chivalrous General" drilling troops for the late Dowager Empress. The myth gathered strength as the years went by and it is reported that the general dressed as a Chinaman, revered by this day.

Wellington's gigantic funeral was

attended by the Duke of Wellington.

For many years afterwards a rumor credited him with being "kept a prisoner" in Aspasia House. Many visitors to the McCallum residence have made up their minds that the famous general was imprisoned there in the hope of catching a glimpse of the captive "Iron Duke."

History is rich with myths and

myths that last.

### Discover Missing Link

Complete Story of Missing Creature  
Is Found In Canada

British anthropologists were thrilled by a despatch from Batavia, Java, which said Professor Humboldt of the Smithsonian Government Medical Service had discovered a complete skull of a prehistoric ape-like creature known by the latte "Missing Link," and by science piliocanthropus cretaceus. The despatch said the skull was found in a same place where Professor Georges Dubois of Amsterdam University, discovered in 1892 the upper part of a skull, a tooth and a bony hinge from which was reconstructed the prehistoric creature, apelike creature known by the latte "Missing Link."

Professor Humboldt's specimen which the despatch said is complete and sound, will be kept in Dutch East India, as experiments of such reliefs in India.

Mrs. Mildred Thedder, who has catalogued more than 6,000 skulls at the Royal College of Surgeons, believes if the reported discovery is true, it is the most important in years.

Dr. Dubois' despatch also informed the left hand of the Borneo River near Trinil. Much discussion followed with many authorities opposing Dr. Dubois' theory. The creature which held to bridge the gap between man and the ape, but some scientists argued it constituted a further piece of evidence in that direction.

### Nightly Alarmed

British newspapermen are considering the condition of Canadian newspapers, which they fear are becoming more and more Americanized, and are wondering what they can do about it. They are, however, already alarmed. Canadian newspapers may be Americanized, according to some recent in methods and news, but in heart they are far from American. They are nearer British in ideals than they are American.

Looks Like Over-Production

President Angel, of Yale, said at a New Haven tea:

"The books in the Yale Library double in number every 60 years. Every year 50,000 new books are added, that many old books being stored away to make room for them. Books, books, books!"

"Of course," he added, "all is not literature that matters."

Careful to wash your face and hands thoroughly — I'm expecting your Auntie!

But suppose she doesn't come?

### Making Use Of Nature

Invention Has Made Gas-Buoy and  
Lighthouses Automatic

An invention of which landmen have not yet written, saves their pocketbooks to the tune of tens of thousands yearly. It is the second sun valve by means of which gas buoys and lighthouses are rendered automatic.

Inside the buoy can be stored enough gas to last for 10 days. If the light is to be turned down in the daytime. To do this work by hand would mean the employment of hundreds of men and launches, and would often be impossible owing to the fact that the gas valve is not on the sun valve the sun is made to do the work. As day breaks the action of the light on a certain substance causes the tap to be turned so that the acetylene gas is cut off. This is the first step in the automation of the lighthouses. Even after this the gas valve is closed and the gas is then turned on again, so that gas is only being consumed during the hours of darkness. Even a heavy fog causes the light to burn.

There is also an electric-light boy of which the light is generated by a mechanism worked solely by wave action. This gives a more powerful light than the gas. The gas valve has been eliminated and which has given in thirty per cent increased yield over unselected stock, says Mr. W. K. McCullough, district inspector, in his report to the Dominion Bureau of Statistics. The Bureau has taken place in the Great Gulf stock as a whole, and in 1925 the Director of Agriculture for Bermuda reported the seed as being "the best ever imported." A start has also been made to introduce the high-grade strains of gas.

CHAPTER XVI

Joanna's Debut

It is only in the great capitals of the world that one may witness, or participate in, a gathering such as Yvonne Coustant delighted occasionally to preside over in her town house of Paris. The young French girl, who in India where a Prince of India may at any time transform a mud-brick palace into a Holt in an exotic fairland for a wild harlequinade, was the brilliant belle of the Indian calendar of old Vienna, and in London, occasionally, a rampant beauty, perhaps a mannequin, newly married to a duke, or a young duchess divorced from her husband, and, in India, one night in its enough extravagance to keep Mayfair gawping for a month.

In America they are rarely accomplished. The domineering of Paris and the social snobbishness of India are not accustomed to ignoring the barbs between them when occasion arises. It is an extraordinary hostess, in America, who can successfully bring together all grades of society, not rich and poor, so much as the good and the not so good.

Yvonne Coustant was one of these. She had no scruples when she opened her house, as to who came into it. She desired no beauty, external grace, and a willingness to be appreciated picture for the shining, golden frame she provided.

"One simply cannot afford not to be in on one's Yvonne's," affirms Mr. Brown, a smiling, polo-ground, respectively, said. "One's husband is sure to be there, and so is his favorite of the moment. I always so in order to discover who that's having now, it's the one who I have to keep up on the ramifications of his taste."

"Yvonne's own bluest, former husband, Alfred Coustant, the novelist, never missed her entertainments. I get at least four visitors from every one of his books," he would explain. "She's awfully good to be me—sort of jolly like, you know."

So it was that an interesting company moved about among the roses

## Will Not Reduce Pensions

New Regulation Extends the Principle of the Irreducible Minimum. No further reduction will be made in the pensions of less than 50 per cent, providing that during treatment the prevalence of active disease was definitely established. This statement was made recently to the Dominion headquarters of the Tubercular Veterans' Association, following negotiations with the board of pension commissioners. In spring the board conceded the pension to be irreducible minimum pension to receipt of that amount or over. This new regulation extends the principle of the irreducible minimum rate of pension to those tubercular veterans in receipt of less than 50 per cent.

Joanna had spent more than a tenth of her million dollars. It was all taken in the cancelled checks.

"The play begins! It is to be a comedy, after all!"

It was said quietly, evenly, but there was just a nuance in the tone that indicated the speaker was not a novice at the art of the theatre.

The speaker stood behind the banker, a figure in faultless evening clothes, silk hatted, white gloved. Always his lips played the writh of a smile, and his eyes, which were blue, there was amusement. Just at that moment an ancient butler appeared at the library door and spoke:

"Your son has arrived, Mr. Braden."

Braden started. "You will be seeing her, tonight, then?" he asked.

"She will be plumped into the abyss tonight, by her mother," said Yvonne Coustant. She will be like a senuous mermaid through the sordid scenes of half a score of old men whose lips she'll moisten with the sight of her, and a hundred young men who will make her eyes there will be first to break. Just as the light is in sight tonight."

Eggleston did not reply for a moment. He raised his glance again to the girl in the painting. Then he said, half to himself:

"Still, I'd like to see her—here, to this room. Arrange, some way, to bring her tomorrow."

He bowed slightly, and went out at the door, and his car, which waited at the curb. He gave his order briefly: "To Miss Coustant's.

Meanwhile Joanna, before her mirror, waited to be summoned to the old room, where young men, and their young women, in old clothes,

Yvonne appeared in the doorway.

The younger girl gave a little gasp when she saw her. In contrast to the young, young girl, the woman was a shaming blonde, who clung to her figure like a sheath, giving her vulcanite and uncovered back bony hole and half its complement. Her shoulders shuddered.

"You will be something of a sensation, tonight, my dear!" the older woman exclaimed, when Joanna had walked across the room, and had whirled and stood still for her inspection. Joanna was much too happy to reply.

Yvonne's appearance among her guests was the signal for dancing to begin—also for the breaking down of the social barriers.

For a moment, however, the new woman who had gathered in stiff little groups to discuss other women or the escapades of other women were away to their first dance, and the room was silent, and the girls of their preferred flirtations.

The big drawing room had been made into a dancing room. In the winter garden, the only lights were flickering lanterns hidden among the trees. Circular tables, across corners of the drawing and sitting rooms, and in the hallways.

"Yvonne," said Mrs. Braden-Smyth, "knows that two people never have to fumble for conversation when they're hidden behind palms."

(To be continued)

From all corners of the world—

Yvonne had come to the great world before—the magic world where beauty is born, and a smile or a kiss brings people like her.

While Joanna stood before her mirror, Andrew Eggleston sat at the long carved table in the sun-bombed library of his house, which was not of the world before, but of the world of yesterday.

He was leaning on his exclusive piano, and was looking at the world with the same eyes as the sheen of his hair, which was like a quavering beam of molten radiance. The lips were red, and full, and shaped for a kiss, but they were not set more than a hair's breadth apart.

"There was no such a thing as a lip stick," the hair was brown, shiny, and moist, as Joanna's, but it was not bobbed—but plied in glorious opulence.

The banker, who was not a man to be trifled with, had his hand across his brow, to break a spell with which the girl in the painting encompassed him.

Then his attention fell to bits of paper spread before him, which he had been reading.

He had picked them up and read them—read the cancelled checks which signified the purchases Joanna had made that day. Checks that had been issued to him, to the girl who had taken her purchases away with her. They totalled thousands, thousands.

At the jewelry store alone

he had spent more than a tenth of his million dollars. It was all taken in the cancelled checks.

"The play begins! It is to be a comedy, after all!"

It was said quietly, evenly, but there was just a nuance in the tone that indicated the speaker was not a novice at the art of the theatre.

The speaker stood behind the banker, a figure in faultless evening clothes, silk hatted, white gloved.

Always his lips played the writh of a smile, and his eyes, which were blue, there was amusement. Just at that moment an ancient butler appeared at the library door and spoke:

"Your son has arrived, Mr. Braden."

Braden started. "You will be seeing her, tonight, then?" he asked.

"She will be plumped into the abyss tonight, by her mother," said Yvonne Coustant. She will be like a senuous mermaid through the sordid scenes of half a score of old men whose lips she'll moisten with the sight of her, and a hundred young men who will make her eyes there will be first to break. Just as the light is in sight tonight."

Eggleston did not reply for a moment. He raised his glance again to the girl in the painting. Then he said, half to himself:

"Still, I'd like to see her—here, to this room. Arrange, some way, to bring her tomorrow."

He bowed slightly, and went out at the door, and his car, which waited at the curb. He gave his order briefly: "To Miss Coustant's.

Meanwhile Joanna, before her mirror, waited to be summoned to the old room, where young men, and their young women, in old clothes,

Yvonne appeared in the doorway.

The younger girl gave a little gasp when she saw her. In contrast to the young, young girl, the woman was a shaming blonde, who clung to her figure like a sheath, giving her vulcanite and uncovered back bony hole and half its complement. Her shoulders shuddered.

"You will be something of a sensation, tonight, my dear!" the older woman exclaimed, when Joanna had walked across the room, and had whirled and stood still for her inspection.

Joanna was much too happy to reply.

(To be continued)

From all corners of the world—

Yvonne had come to the great world before—the magic world where beauty is born, and a smile or a kiss brings people like her.

While Joanna stood before her mirror, Andrew Eggleston sat at the long carved table in the sun-bombed library of his house, which was not of the world before, but of the world of yesterday.

He was leaning on his exclusive piano, and was looking at the world with the same eyes as the sheen of his hair, which was like a quavering beam of molten radiance. The lips were red, and full, and shaped for a kiss, but they were not set more than a hair's breadth apart.

"There was no such a thing as a lip stick," the hair was brown, shiny, and moist, as Joanna's, but it was not bobbed—but plied in glorious opulence.

The banker, who was not a man to be trifled with, had his hand across his brow, to break a spell with which the girl in the painting encompassed him.

Then his attention fell to bits of paper spread before him, which he had been reading.

He had picked them up and read them—read the cancelled checks which signified the purchases Joanna had made that day. Checks that had been issued to him, to the girl who had taken her purchases away with her. They totalled thousands, thousands.

Thursday, Oct. 28, 1926

Mrs. J. Boswell has been on  
the sick list, this past week.

W. C. Boyd, is visiting in  
Calgary.

H. Stone, of Leader, was a  
visitor to Town, October 26.

To Mr. and Mrs. G. L.  
Lamb, of Leader, October 26.

Mr. Mountain, who under  
the direction at the local  
library, is said to be  
writing a history.

F. Sabey, and children,  
had a week from a visit  
to their home in Innsbruck, Austria.

Montgomery, house  
keeper at the hospital has been  
confined to bed with illness,  
during the past week.

Lars Olson, was in town on  
Tuesday. Lars is making his  
headquarters these days at  
Eaton.

At this season, we would ap  
preciate payments on sub  
scriptions by some of our sub  
scribers. Thank you.

We are agents for all maga  
zines, literature. Bring us your  
orders and Renewals. — "Em  
press Express".

The sale of horses held at  
Bindloss, on Saturday, was can  
celled off a few hours had been  
seen sold. The prices reached  
were not satisfactory.
